EAD work authorization - authorized to work in the U.S., no sponsorship required - available to start immediately

Software and data engineer building Python backend services, ML pipelines and ETL systems. Since 2021 I have built production systems for two companies, remotely and part-time alongside full-time study. M.S. in Computer Science at the University of South Florida, May 2027.

EDUCATION

University of South Florida, Tampa, FL
Master of Science (M.S.) in Computer Science, Data Science track — Aug 2025 - May 2027 (expected)
Bachelor of Science (B.S.) in Computer Science — Aug 2021 - May 2025

EXPERIENCE

SƏBA ASC | Machine Learning Engineer
Baku, Azerbaijan (remote, part-time) | *Jun 2023 - Present* | *alongside full-time study at USF*

- Built GenAI features across **8 ERP systems**, using LangChain RAG pipelines and LangGraph orchestration.
- Built inference APIs on AWS processing **500K+ records a day**.
- Monitored model drift with MLflow across **3 production models**.
- Fine-tuned models with PEFT/LoRA for those GenAI features.

AzeriMed LLC | Data Analyst & Software Developer
Baku, Azerbaijan (remote, part-time) | *Sep 2021 - May 2023*

- Built SQL analytics pipelines, **cutting report generation time by 70%**.
- Built React and TypeScript dashboards used by **50+ clinical staff**.
- Built Python ingestion with validation for **100K+ records a month**.

PROJECTS

Autonomous Bug-Fix Agent - Python, Anthropic Agent SDK, pytest - github.com/Tajaddin/code-fix-agent
Agent that reproduces, patches and verifies Python bugs in a pytest-driven fix loop: **12/12 benchmark bugs fixed on Claude Haiku 4.5, 3.58 mean iterations per bug, $0.10 total cost**.

gRPC Key-Value Store - Go, gRPC, Docker - github.com/Tajaddin/go-grpc-kvstore
In-memory KV store over gRPC and REST with TTL, streaming Watch and sharded concurrency: **~51,800 ops/sec at p99 2.84 ms** on the Get path; 16 race-tested cases.

Task REST API - Java, Spring Boot 4, PostgreSQL, Flyway - github.com/Tajaddin/spring-boot-task-api
JWT-authenticated REST API with bcrypt password hashing, per-user authorization and Flyway migrations: **973 req/s at p99 159 ms** on an authenticated endpoint; 14 tests, 84% coverage.

Event-Time Streaming ETL - Python, DuckDB - github.com/Tajaddin/streaming-etl-pipeline
Streaming ETL with per-partition watermarks (**0% false-late events vs 71% for a naive single watermark**), late-data side outputs and crash-safe checkpointing; 25 tests.

Fake News Detection: Leakage Audit - Python, Hugging Face, SHAP, LIME, MLflow - github.com/Tajaddin/fake-news-detector-ml
Built a six-step data audit showing a 99-100% baseline accuracy came from publisher and stylistic leakage; reported the honest result: **62.1% accuracy, 0.676 ROC-AUC on held-out LIAR data**.

TECHNICAL SKILLS

Languages: Python, SQL, Go, TypeScript, Java, Kotlin, C#, C/C++, JavaScript, Bash
ML and AI: PyTorch, TensorFlow, scikit-learn, Hugging Face, XGBoost, MLflow, LangChain, LangGraph, Anthropic Agent SDK, RAG, PEFT/LoRA
Data: Apache Spark, PySpark, Apache Airflow, Kafka, ClickHouse, DuckDB, Pandas, ETL/ELT, PostgreSQL, MongoDB
Infrastructure: AWS, GCP, Docker, Kubernetes, Helm, Terraform, GitHub Actions, CI/CD, gRPC, FastAPI, REST
Spoken: English (fluent), Azerbaijani (native), Turkish (fluent)
