Authorized to work in the U.S. - no sponsorship required

Software and data engineer building Python backend services, ML pipelines and ETL systems. Since 2021 I have built production systems for two companies. M.S. in Computer Science at the University of South Florida, May 2027.

EDUCATION

University of South Florida, Tampa, FL
Master of Science (M.S.) in Computer Science, Data Science track — Aug 2025 - May 2027 (expected)
Bachelor of Science (B.S.) in Computer Science — Aug 2021 - May 2025

EXPERIENCE

SƏBA ASC | Machine Learning Engineer
Baku, Azerbaijan (remote, part-time) | *Jun 2023 - Present* | *alongside full-time study at USF*

- Developed GenAI features for **8 ERP systems** with LangChain RAG pipelines and LangGraph orchestration.
- Developed inference APIs on AWS that process **500K+ records a day**.
- Monitored model drift with MLflow across **3 production models**.
- Fine-tuned models with PEFT/LoRA for those GenAI features.

AzeriMed LLC | Data Analyst & Software Developer
Baku, Azerbaijan (remote, part-time) | *Sep 2021 - May 2023*

- Developed SQL analytics pipelines that **reduced report-generation time by 70%**.
- Developed React and TypeScript dashboards used by **50+ clinical staff**.
- Implemented Python ingestion that validates **100K+ records a month**.

PROJECTS

Autonomous Bug-Fix Agent - Python, Anthropic API, pytest - github.com/Tajaddin/code-fix-agent
Agent that reproduces, patches and verifies Python bugs in a pytest-driven fix loop: **fixed 12/12 bugs in its own benchmark set on Claude Haiku 4.5**, 3.58 mean iterations per bug, $0.10 total API cost.

Task REST API - Java, Spring Boot 4, PostgreSQL, Flyway - github.com/Tajaddin/spring-boot-task-api
JWT-authenticated REST API with bcrypt password hashing, per-user authorization and Flyway migrations: **973 req/s at p99 159 ms** on an authenticated endpoint in a single-machine load test; 14 tests, 84% coverage.

Event-Time Streaming ETL - Python, DuckDB - github.com/Tajaddin/streaming-etl-pipeline
Streaming ETL with per-partition watermarks (**0% false-late events vs 71% for a naive single watermark**), late-data side outputs and crash-safe checkpointing; 25 tests.

TECHNICAL SKILLS

Languages: Python, SQL, Go, TypeScript, Java, Kotlin, C#, C/C++, JavaScript, Bash

ML and AI: PyTorch, TensorFlow, scikit-learn, Hugging Face, XGBoost, MLflow, LangChain, LangGraph, Anthropic API, RAG, PEFT/LoRA

Data: Apache Spark, PySpark, Apache Airflow, Kafka, ClickHouse, DuckDB, Pandas, ETL/ELT, PostgreSQL, MongoDB

Backend and infrastructure: Spring Boot, FastAPI, REST, gRPC, AWS, GCP, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD

Spoken: English (fluent), Azerbaijani (native), Turkish (fluent)
